SILENT

CUSTOMIZABLE

VERSATILE

COMPLIANT

The hydraulic Homelift is a silent elevator designed for use in residential and commercial building and with supervised use in public offices .

Hydraulic Homelift provides many standard and optional features to help you to create a customized elevator to meet all of your needs. The option excluding the car door operates with constant constant pressure and comes with a Class II safety edge.

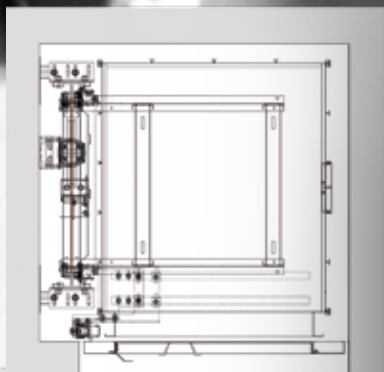

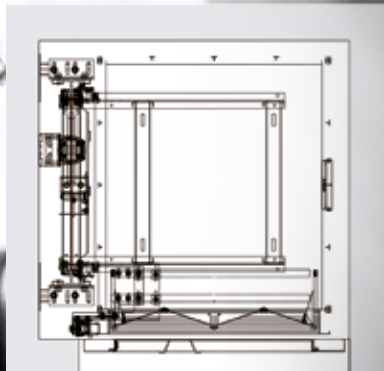

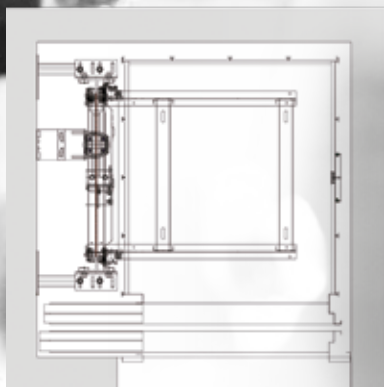

Thanks to its versatility, Homelift has overcome many architectural barriers in the residential ambient. It's design is easily adaptable to your required dimensions. As an option the tank and the controller can be positioned in a cabinet with reduced dimensions.

The hydraulic homelift complies to the Machine directive and the European Directive for Vertical Platform elevators for the use of wheelchairs. The reduced speed and cabin dimensions are ideal for this.

SAFETY

PIT	Mechanical final limit
HEADROOM	Mechanical final limit
AUTOMATIC DOORS	Certified lock
SWING DOORS	Certified lock
CAR SAFETY GEAR	✓
RUPTURE VALVE	✓
EMERGENCY RESCUE IN CASE OF POWER CUT	✓
